

REPSOL HEALTHCARE HLD02G

HLD02G is a low density polyethylene grade, produced by high pressure autoclave technology, suitable for blown or cast film applications. It is also used to make little containers by extrusion blow moulding. This material offers easy processability and good balance of mechanical and optical properties. It contains slip, antiblock, antioxidant additives.

Typical Applications

- Bags, pouches
- Blow-fill- seal applications
- Medical films
- Small blow molding bottles

Recommended melt temperature range from 150 to 180°C. Processing conditions should be optimized for each production line

PROPERTIES	VALUE	UNIT	TEST METHOD
General			
Melt Flow Rate (190 °C; 2.16 kg)	2	g/10'	ISO 1133
Density at 23°C	920	kg/m ³	ISO 1183
Melting temperature	110	°C	Internal (DSC)
Film (1)			
Dart drop (F ₅₀)	90	g	ISO 7765-1
Tear resistance (Elmendorf) (MD/TD)	300/125	cN	ISO 6383-2
Tensile stress at break (MD/TD)	29/20	MPa	ISO 527-3
Tensile stress at yield (MD/TD)	10/10	MPa	ISO 527-3
Elongation at break (MD/TD)	200/550	%	ISO 527-3
Coefficient of friction	<0,1	-	ISO 8295
Gloss (45°)	60	%	ASTM D-2457
Haze	8	%	ASTM D-1003
Thermal			
Vicat softening temperature (load 10N)	91	°C	ISO 75

(1) 30 µm thickness film, blow up ratio 2.25:1, frost line height 40 cm.

HLD02G complies with EP 3.1.3, EP 3.1.5.and USP. For further information, please contact our Technical Service and Development Laboratory or our Customer Care Service.

STORAGE

HLD02G should be stored in a dry atmosphere, on a paved, drained and not flooded area, at temperatures under 50°C and protected from UV radiation. Storage under inappropriate conditions could initiate degradation processes which may have a negative influence on the processability and the properties of the transformed product.

May 2017

*This product(s) may not be used in:

- (i) any U.S. FDA Class I and/or European Union Class I Medical Devices (Non-invasive devices), without prior notification to Seller for each specific product and application
- (ii) the manufacture of any of the following, without prior written approval by Seller for each specific product and application: U.S. FDA Class II and/or European Union Class II Medical Devices:
 - Category IIa: Invasive devices with limited risk: e.g. syringes, lancets, insulin pens.
 - Category IIb: Invasive devices with higher risk: e.g. pouches for dialysis processes.
- (iii) in U.S. FDA Class III, and/or European Class III Medical Devices; Category III: Very high risk devices: long-term (> 29 days) or permanent implants, long term (> 29 days) applications in direct contact with any body part or any body fluid.
